USGS Gold King Mine spill 8 12.docx

I can add this to our report.

**Subject:** FW: Gold King Mine spill – Update of USGS sampling efforts

Below is an update of USGS sampling efforts related to the Gold King Mine spill. I have already initiated a SPOT report for the Watch office and OEM. I receive updates very late in the day and should have additional information about this same time tomorrow evening.

Please let me know if you have any further questions.

Thanks

Holly
